DETAILED ACTION

1. Applicant's election without traverse of Group I in the reply filed on April 21, 2003 is acknowledged.

2. Claims 15-28 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on April 21, 2003.

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 1-14 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In the independent claims Applicant recites "a method of chemical mechanical polishing". However, there is no method step recited which is capable of performing the chemical aspect of the polishing. Applicant should include a recitation of structure in the method steps, which is capable of performing the chemical aspect of the polishing. In claim 5, line 5 the phrase "the second platen" is without proper antecedent support in that no second platen has been earlier recited.

5. Claims 1-14 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action.

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Hosokai is cited of interest to show a linear polishing apparatus with means to rotate the working surface of the polishing tape, and intermittent indexing

of the polishing tape. Baldy et al is cited of interest to show another reel-to-reel type polishing apparatus for wafer polishing.
